

Layers Of Time

1. Prior Knowledge:

What do you think a fossil is?

A bone that is very old

2. Find a good definition of the term, fossil, and write it below.

A preserved remains of a living organism

3. Go to the [Layers of Time](#) game page.

4. Click the **WATCH!** button to learn the two key facts you need to know before you play Layers Of Time.

5. What is the first key fact?

Fossils are created over time

6. What type of rock are fossils found in?

Sedimentary rock

7. What is the second key fact

Extinction is forever

8. Click the game **START!** button, mute the sound, and select the 'easy' level. Check to see that there is a column for ammonite fossils. If not, then click the 'easy' level again until you see a column for ammonites.

9. Play until you have successfully arranged the sedimentary rock layers.

10. Click "show layer names" and list the rock layers from oldest to youngest.

Carboniferous-> Permian-> Triassic-> Jurassic

11. In which layer did ammonites become extinct?

Carboniferous

12. Select the 'Hard' level of the game. Check to see that there are columns for dicynodont and bird fossils. If not, then click the 'hard' level again until you see columns for both of these fossils.

13. Play until you have successfully arranged all of the sedimentary rock layer.

14. In which layer did birds first appear in the fossil record?

Birds appeared first in the Jurassic layer

15. What fossil organism lived for the longest period of time? Explain how you know.

The shark fossil lived the longest, then the birds appeared.

16. Did birds and dicynodonts ever live at the same time? Explain how you know.

Yes, because the birds and dicynodont lived in the period causing the fossil column to stretch

17. Which fossil organism lived for the shortest period of time? Explain how you know.

The horses because the dinosaurs lived for only 2 years

18. What fossil organism appears in the fossil record most recently?

Horse organism appears to be in the fossil record

19. What fossil organism most recently became extinct?

Dinosaur became extinct more recently because they became extinct the tertiary year
